REPORT OF

INDUSTRIAL VISIT on "Dhoot Transmission Pvt. Ltd."
Organized by- Electronics Engineering (VLSI Design & Technology)

Date: 01/12/2025

Time: 11:00 AM to 03:00 PM

Venue: Dhoot Transmission Pvt. Ltd., Shendra MIDC, Chhatrapati Sambhajinagar

No. of Participant: 72 Third Year Students of B.Tech VLSI Design & Technology with four faculties.

Nature of Activity: Extracurricular

Goal: To provide students practical exposure to industrial processes, manufacturing techniques, and real-time working environment in the field of electronics and electrical systems.

Objective: The main objectives of the Industrial Visit were:

1. To understand the manufacturing process of wiring harness and electrical assemblies.
2. To observe real-time industrial automation and quality control techniques.
3. To learn about safety rules, production workflow, and testing procedures.
4. To gain knowledge of various machines and tools used in wiring harness production.
5. To bridge the gap between theoretical knowledge and industrial practices.

About Dhoot Transmission Pvt. Ltd.:

Dhoot Transmission is one of India's leading manufacturers of:

1. Wiring Harness
 2. Control Cables
 3. Power Cords
 4. Automotive Components
 5. Connector Assemblies
- The company supplies products to major automobile manufacturers like:
Bajaj Auto, TVS, Hero, Mahindra, Honda, etc.
 - The company is known for high-quality manufacturing, advanced machinery, and strict quality testing procedures.

About the Industrial Visit:

- **The Industrial Visit to Dhoot Transmission Pvt. Ltd. was organized by** Department of Electronics Engineering (VLSI Design & Technology), CSMSS Chh. Shahu College of Engineering.
- The visit started with a short introduction about the company and safety guidelines. Students were divided into small groups and guided by technical supervisors.

Major Sections Observed During Visit

1. **Wiring Harness Manufacturing Unit**
 - Students saw how cables are cut, stripped, crimped, and assembled.
 - Automatic and semi-automatic crimping machines were shown.
2. **Quality Testing Department**
 - Continuity testing
 - Pull test
 - Visual inspection
 - Short-circuit testing
3. **Connector Assembly Unit**
 - Students observed how different connectors are assembled and locked.
4. **Packaging & Dispatch Section**
 - Final products were packed with labels and dispatched to OEMs.
5. **Safety and Management Instructions**
 - Importance of PPE
 - Clean and systematic workflow
 - Lean manufacturing and 5S system in the plant

Student Learning Outcomes:

1. Understood complete wiring harness manufacturing process.
2. Gained knowledge about industrial machines and automation.
3. Learned how quality control is performed in real time.
4. Observed workflow management, teamwork, and safety rules.
5. Experienced real industrial environment helpful for future jobs and projects.

REPORT OF INDUSTRY VISIT

Airport Authority of India (AAI), Aurangabad Airport, Chh. Sambhajnagar

Date: 07/11/2025

Venue: Airport Authority of India (AAI), Aurangabad Airport, Chh. Sambhajnagar

Date of Industrial Visit: 07/11/2025

No. of Participants: 70 Second year students of B.Tech (Electronics Engineering-VLSI Design & Technology) with four faculties

Nature of Activity: Extracurricular

Goal: To provide students with real-time exposure to airport operations, aviation communication systems, air traffic services, and advanced electronic navigation aids used by the Airport Authority of India. The visit aimed at connecting academic learning with practical implementation in the aviation sector.

Objective: The main objective of the program is as follows:

- To understand airport operations and aviation communication technologies used by AAI.
- To explore Navigation Aids (NAVAIDs) such as DVOR, DME, NDB, ILS and radar-based systems.
- To observe the functioning of Air Traffic Control (ATC) and learn about airline traffic monitoring and communication protocols.
- To understand the role of Electronics and Communication in Aviation Safety.
- To bridge the gap between classroom theory and real-world aviation applications.
- To gain awareness about career opportunities in AAI and the aviation sector.

Benefits/outcomes:

Students will have practical exposure to industrial processes.

- Students will gain practical exposure to airport technical operations.
- Students will understand aviation communication and surveillance systems.
- Students will learn about safety protocols, ATC communication, and airport management workflow.
- Students will be able to correlate electronic engineering concepts with aviation systems.
- Students interacted with aviation engineers and ATC officers.
- Mapping with Program Outcomes: PO1, PO2, PO4, PO5

About Company:

The **Airport Authority of India (AAI)** is a Government of India organization responsible for creating, upgrading, maintaining, and managing civil aviation infrastructure in India, both on the ground and in the air.

AAI manages:

- Airports
- Air Navigation Services (ANS)

- Air Traffic Management (ATM)
- Communication, Navigation, and Surveillance (CNS) Systems

Aurangabad Airport, under AAI, provides critical services such as:

- Flight Operations and Air Traffic Control
- Aviation Safety
- Communication & Navigation Services
- Runway and Terminal Operations
- Passenger Services

About Visit:

The visit was organized by the **Electronics Engineering (VLSI D&T) Department**, CSMSS Chh. Shahu College of Engineering for the Second-Year students.

The visit was coordinated by:

- Dr. Jitesh Shinde
- Mr. Ganesh Patil
- Mr. G. R. Bhalekar
- Ms. Komal B. Dandge

under the guidance of:

- **Mr. S. B. Kulkarni**, Training & Placement Head
- **Dr. S. J. Honade**, HoD – Electronics Engineering (VLSI D & T)
- With the support of **Dr. G. B. Dongare**, Principal

Students interacted with **AAI Technical Officers, ATC Engineers, and CNS Engineers**, who explained various airport systems, communication technologies, and navigation aids.

Facilities Explored

A. Air Traffic Control (ATC)

Students observed:

- ATC tower functioning
- Voice communication systems between pilots and ATC
- Radar surveillance basics
- Flight take-off & landing operations
- Safety protocols for runway management

B. CNS – Communication, Navigation & Surveillance Systems

AAI officers explained:

1. Communication Systems

- VHF communication
- Ground-to-air communication
- Controller–Pilot Data Link Communication (CPDLC) basics

2. Navigation Systems (NAVAIDs)

Students learned about:

- DVOR (Doppler VHF Omni Range)
- DME (Distance Measuring Equipment)
- NDB (Non-Directional Beacon)
- ILS (Instrument Landing System) for accurate aircraft landing

3. Surveillance Systems

Understanding of:

- Primary and secondary radar concepts
- Automatic Dependent Surveillance–Broadcast (ADS-B)

C. Airport Electrical and Electronics Systems

Students explored:

- Runway lighting systems
- Approach and threshold lights
- Power backup systems and UPS
- Airport security systems

- Meteorological equipment (Met systems)

D. Airport Operations & Safety

Students observed:

- Apron operations
- Baggage handling systems
- Airport emergency procedures
- Safety systems used during aircraft landing and take-off

Key learning:

- **Real-World Use of Electronics in Aviation:**
Exposure to CNS/ATM systems strengthened students' understanding of embedded systems, communication, radar, and signal processing.
- **Understanding of End-to-End Airport Operations:**
Students witnessed how multiple systems synchronize for safe flight operations.
- **Importance of Reliability and Safety:**
AAI engineers emphasized the role of precision, redundancy, and maintenance in aviation electronics.
- **Career Awareness:**
Students learned about job roles in AAI, aviation electronics, CNS engineering, and ATC services.
- **Professional Skills:**
Enhanced communication, observation, teamwork, and professional etiquette.

Student Feedback

Students expressed great enthusiasm and considered the visit highly educational. Key feedback:

- **Highly Informative:**
Students appreciated learning about real-time communication and navigation systems.
- **Concept Clarity:**
Exposure to ATC operations made complex topics easier to understand.
- **Motivational:**
Many students expressed interest in careers related to ATC, aviation electronics, avionics, and airport operations.
